Graph Neural
Nets

Knowledge Graph Embeddings

Goal: encode nodes so that **similarity in the embedding space (e.g., dot product)** approximates **similarity in the original network**

Tensor Factorization

KGE - RESCAL

Goal - factorize a sparse 3D tensor to dense E and R

KGE - Expressivity & Rules

TF can be enriched with logical rules and can learn rules

Model	Score Function	Symmetry	Antisymmetry	Inversion	Composition
SE	$-\ W_{r,1}\mathbf{h} - W_{r,2}\mathbf{t}\ $	✗	✗	✗	✗
TransE	$-\ \mathbf{h} + \mathbf{r} - \mathbf{t}\ $	✗	✓	✓	✓
TransX	$-\ g_{r,1}(\mathbf{h}) + \mathbf{r} - g_{r,2}(\mathbf{t})\ $	✓	✓	✗	✗
DistMult	$\langle \mathbf{h}, \mathbf{r}, \mathbf{t} \rangle$	✓	✗	✗	✗
Complex	$\text{Re}(\langle \mathbf{h}, \mathbf{r}, \bar{\mathbf{t}} \rangle)$	✓	✓	✓	✗
RotatE	$-\ \mathbf{h} \circ \mathbf{r} - \mathbf{t}\ $	✓	✓	✓	✓

Table 2: The pattern modeling and inference abilities of several models.

Tensor
Factorization

KGE - TransE

Translate entities and relations into one embedding space

$$h + r \approx t \quad \text{Moscow} + \text{capitalOf} \approx \text{Russia}$$

Translation

(a) TransE

(b) TransH

Tensor Factorization

KGE - Hyperbolic

Goal: embed hierarchical structures into an n-dimensional Poincaré ball.

Translation

(a) Geodesics of the Poincaré disk

(b) Embedding of a tree in \mathcal{B}^2

(c) Growth of Poincaré distance

Figure 1: (a) Due to the negative curvature of \mathcal{B} , the distance of points increases exponentially (relative to their Euclidean distance) the closer they are to the boundary. (c) Growth of the Poincaré distance $d(\mathbf{u}, \mathbf{v})$ relative to the Euclidean distance and the norm of \mathbf{v} (for fixed $\|\mathbf{u}\| = 0.9$). (b) Embedding of a regular tree in \mathcal{B}^2 such that all connected nodes are spaced equally far apart (i.e., all black line segments have identical hyperbolic length).

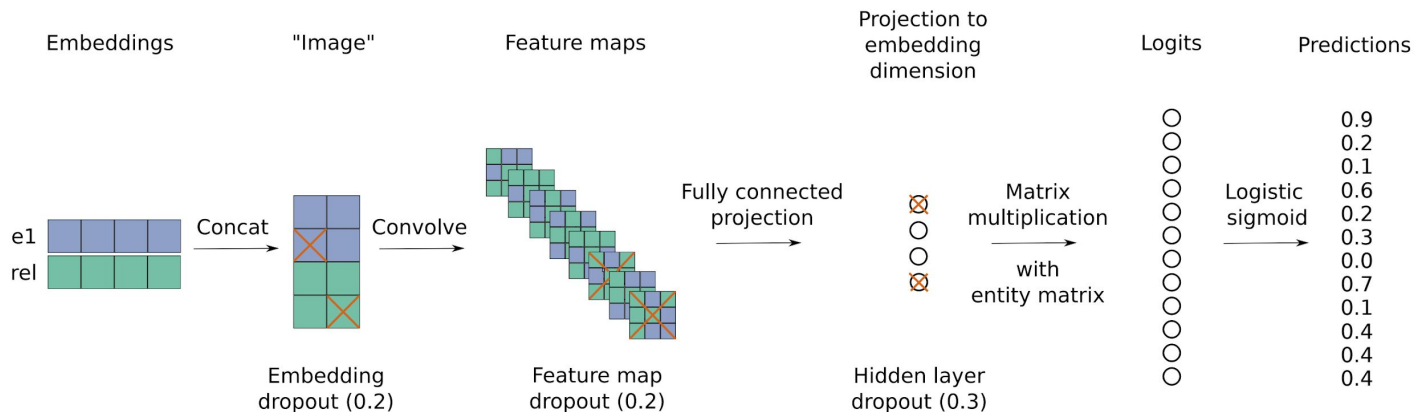

Tensor
Factorization

KGE - ConvE

Goal: CNNs for predicting a probability of the object

Translation

Convolution

Tensor
Factorization

KGE - Graph Networks

Goal: leverage topological graph characteristics

Translation

Convolution

Nets**

Question Answering over KGs

How many Marvel movies was Robert Downey Jr. casted in?

KGQA

How many **Marvel** **movies** was **Robert Downey Jr.** **casted** in?

```
SELECT COUNT(?uri) WHERE {  
  ?uri dbp:studio dbr:Marvel_Studios.  
  ?uri dbo:starring dbr:Robert_Downey_Jr  
}
```

KGQA

How many **Marvel** **movies** was **Robert Downey Jr.** **casted** in?

```
SELECT COUNT(?uri) WHERE {  
  ?uri dbp:studio dbr:Marvel_Studios.  
  ?uri dbo:starring dbr:Robert_Downey_Jr  
}
```

All
marvel
movies

Every
thing
starring
RDJ

Find the
intersection

KGQA

How many **Marvel** **movies** was **Robert Downey Jr.**
casted in?

```
SELECT COUNT(?uri) WHERE {  
  ?uri dbp:studio dbr:Marvel_Studios.  
  ?uri dbo:starring dbr:Robert_Downey_Jr  
}
```

All

entities
left

KGQA

How many **Marvel** **movies** was **Robert Downey Jr.**
casted in?

```
SELECT COUNT(?uri) WHERE {  
  ?uri dbp:studio dbr:Marvel_Studios.  
  ?uri dbo:starring dbr:Robert_Downey_Jr  
}
```

Entity Linking

Who is the CEO of **Apple**?

 **Apple** belongs to which genus?

movie character

 **Downey** played **Iron Man** in which year?

Who is the alter ego of **Iron man**?

comic character

Relation Linking

Name all the movies in which **Robert Downey Jr** **Acted**? dbo:starring

Which movies have **RDJ**?

Flicks where I can see **Robert DJ**?

Find me all the films **casting** **Rober Downey Jr** ?

List all the movies **starring** **Robert Downey Junior**?

RDJ **has acted** in which movies?

Relation Linking - Implicit Predicates

Name all the movies in which **Robert Downey Jr** **Acted**?

Which movies have **RDJ**?

Flicks where I can see **Robert DJ**?

Find me all the films **casting** **Rober Downey Jr** ?

List all the movies **starring** **Robert Downey Junior**?

RDJ **has acted** in which movies?

Raw text-based dialogue systems

My name is John

Hello, John!

I left my keys in the kitchen.
Can you find them?

In the kitchen

<Long input>

<excerpt from the
long input>

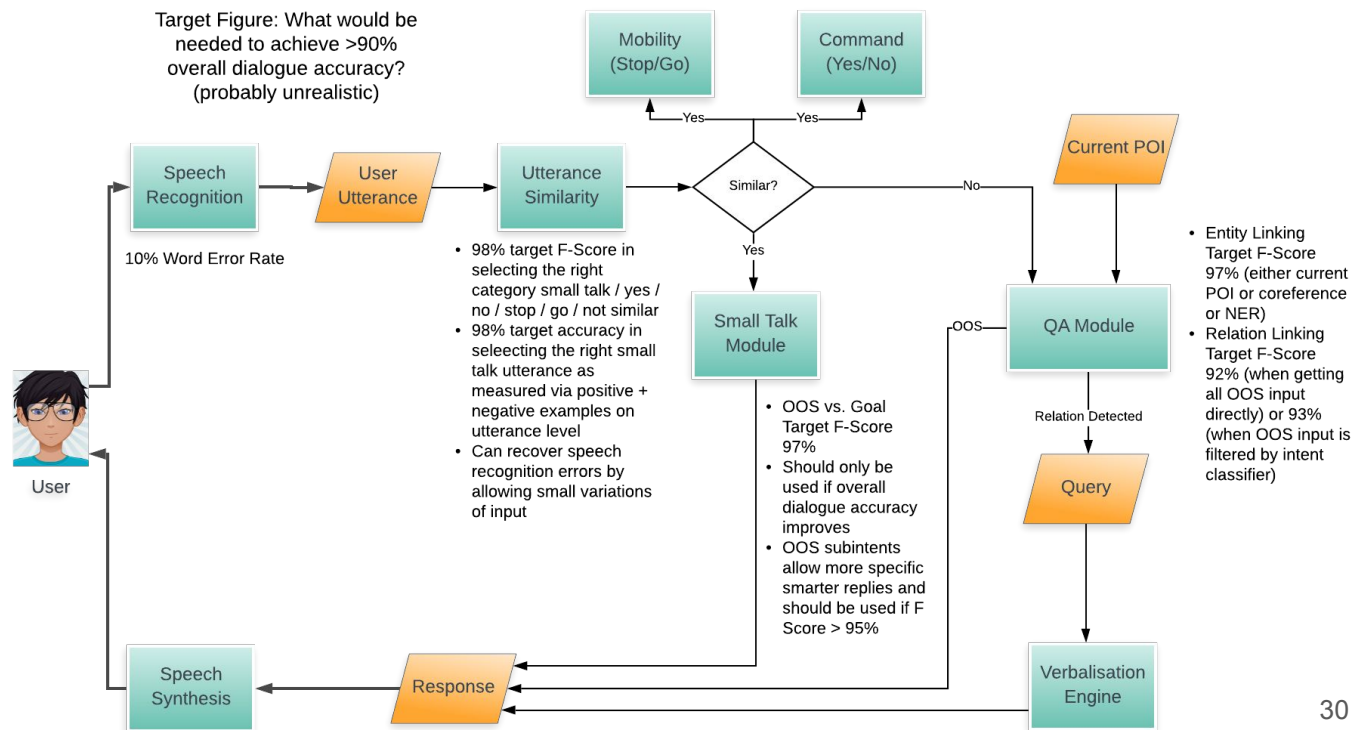

- Mostly sequence to sequence over textual inputs
- Some basic causal NL inference (s1 follows s2)
- Effective on simple utterances over short paragraphs
 - No memory (with exceptions)
 - No format and justifiable knowledge

KGs & Conversational AI

KGs & Conversational AI

Challenge: incorporate graph-based reasoning into dialogue systems over Knowledge Graphs

- (a) Dialog
- 1 Can you recommend any classic books like *Catcher in the Rye*?
 - 2 Do you prefer books by the same *author* or same *genre*?
 - 3 I am interested in reading classic examples of *American literature*.
 - 4 *Literary realism* is a common genre in classic *American literature*.
 - 5 Do you prefer *First-person* or *Third-person narrative*?
 - 6 I mostly prefer *third-person narrative*.
 - 7 Consider reading the *Scarlet Letter*: a novel by *Nathaniel Hawthorne*.
- ⋮

Complex Sequential Question Answering

USER: What is the weapon used by HMS Regulus ?

SPEAKER: Torpedo 61

USER: Who is the manufacturer of that ranged weapon ?

SPEAKER: FFV

USER: Is that social group located in Seeley Union Elementary School District and Succivo ?

SPEAKER: NO

USER: Is Swedish Navy the facility operator of Torpedo 61 ?

SPEAKER: YES

USER: Which ranged weapons are used as weapons by atmost 140 ship types and aircraft power classes ?

SPEAKER: Mark 44, Mark 43, Torpedo 613

USER: Which ship types are the etymology of atmost 1 social group ?

SPEAKER: HMS Spica, HMS Invincible, HMS Queen Elizabeth

USER: How many military branches or organizations are the creator of the design for Mark 44 ?

SPEAKER: 2

USER: What are the port of registry of atleast 1 ship type ?

SPEAKER: Riga, Marseille, Bremerhaven

USER: Which ranged weapons are used as weapons by atleast 17 ship types or aircraft classes ?

SPEAKER: Torpedo 45, Mark 48 torpedo, Torpedo 61

So why you need graphs?

How many children
does Berlin Hbf have?

Implicit or explicit constraints on produced answers

So why you need graphs?

How many children
does Berlin Hbf have?

Train stations
don't have kids

Implicit or explicit constraints on produced answers

- reduce candidates space
- help to fight the mushroom effect
- **ontologies help**

So why you need graphs?

How many children
does Berlin Hbf have?

Train stations
don't have kids

What is the busiest
train station in
Germany?

Implicit or explicit constraints on produced answers

- reduce candidates space
- help to fight the mushroom effect
- **ontologies help**

Complex QA via (sub)graphs aggregations

So why you need graphs?

How many children does Berlin Hbf have?

Train stations don't have kids

What is the busiest train station in Germany?

Hamburg Hbf

Implicit or explicit constraints on produced answers

- reduce candidates space
- help to fight the mushroom effect
- **ontologies help**

Complex QA via (sub)graphs aggregations

```
select ?station ?visits where {  
  ?station wdt:P31 wd:Q18543139 .      # central stations  
  ?station wdt:P17 wd:Q183 .          # in Germany  
  ?station wdt:P1373 ?visits .        # daily visits  
} ORDER BY DESC(?visits) LIMIT 1     # sort
```

So why you need graphs?

Takeaway 1

Graphs significantly improve reasoning compared to sole natural language inference

So why you need graphs?

Takeaway 1

Graphs significantly improve reasoning compared to sole natural language inference

Takeaway 2

Reasoning outcomes are explainable and traceable

Enriched knowledge
representations

KGs at scale and robust querying

Graph-based reasoning
for complex QA
